

Nighttime allows the body  
to regenerate,  
but only as long as  
uninterrupted sleep  
is provided.

Being incontinent forces many people to wake up at night to go to the toilet or change the absorbent products they or their loved ones are using. However, this can be avoided if you use products designed to last longer.

Seni recommends the use of special briefs and underwear that are more absorbent and can provide protection for the entire night.

This results in better rest  
for the wearer and  
for the caregiver!

Seni Overnight products are available in many sizes.  
The selection of suitable size is very important.

Products that are too big may cause leakages,  
and products that are too small can lead  
to abrasions and irritations of the skin.

As a geriatric Care Manager I have many clients  
who are incontinent or experience other urinary  
issues. Seni products are absolutely AMAZING.  
My clients and families love them. They allow them  
not to fear going out and provide a sense of security  
and comfort. They also prevent any skin breakdown.  
Until you try them you cannot believe how wonderful  
they are. They are especially good if a person suffers  
from some type of dementia and gets agitated if they  
need changing. Due to design and absorbency  
they don't need to be changed as often. I never  
thought I would become so enthusiastic about  
an incontinence / bladder product but they deserve  
high praise. You use less products so they are very  
cost effective.

Since my husband is wearing Seni at night no more  
accidents happen. I do not have to take extra clothing  
with me in case the pads do not hold.  
We can recommend them for everybody who  
is heavily incontinent. They are excellent. My husband  
will not wear any other brand but these.
