

# Seni Active

## They are created for people:

leading an active lifestyle

who need more absorbent products than bladder control pads

during bladder training and toilet training

with dementia, who refuse wearing briefs

For lighter incontinence protection we recommend Seni Lady Bladder Control Pads and Seni Man Guards.

Active people also love the Seni Shaped Pads solution thanks to the ease in changing pads no matter where you are, discreetness and the universal sizing. Available in Day and Night time absorbency.

Use SeniControl App or go to "Choosing the right product" at [www.seni-usa.com](http://www.seni-usa.com) to select the most appropriate type of Seni protection.

	S-XX12-AP1	XX-LARGE	62"- 80"	4x12

The selection of suitable size is very important.  
Products that are too big may cause leakages, and products that are too small can lead to abrasions and irritations of the skin.

### What others say about Seni?

*As a geriatric Care Manager I have many clients who are incontinent or experience other urinary issues. Seni products are absolutely AMAZING. My clients and families love them. They allow them not to fear going out and provide a sense of security and comfort. They also prevent any skin breakdown. Until you try them you cannot believe how wonderful they are. They are especially good if a person suffers from some type of dementia and gets agitated if they need changing. Due to design and absorbency they don't need to be changed as often. I never thought I would become so enthusiastic about an incontinence / bladder products but they deserve high praise. You use less products so they are very cost effective.*

### Innovative design of absorbent core

provides a feeling of dryness for both  
moderate and heavy incontinence.

Seni Active's outer layer allows vapor to go through helping sensitive skin to breathe easily. Millions of microscopic pores allow vapor to flow in and out, but keep liquid and odor in. This helps to minimize the risk of skin irritation.

Superabsorbent inside the double absorbent core locks in moisture so that it doesn't irritate delicate skin. Locking urine in the absorbent core decreases the bacterial growth and helps contain urine odor.

Hydrophobic standing side gathers protect from side leakage and provide additional protection.
