	Seni Care Body Care Cream	S-BCC4-C31	4 fl. oz. (120 mL)	Tube	6

**CLEANSE**

Everyday hygiene with limited mobility is easier with gentle but effective no-rinse cleansing products.

- Adult Size Cleansing Wipes** are recommended for routine cleansing of perineal areas.
- Cleansing Body Cream** leaves the skin odor free and moisturized. Recommended for use with **Personal Care Gloves**.

**MOISTURIZE**

- Moisturizing Body Lotion** uses urea to soften and moisturize the skin. Easy to spread consistency and absorbs easily.

**CARE**

- Body Care Cream** supports healthy everyday care of sensitive skin in people that use absorbent products. Neutralizes urine odor.

## Conferences

We organize many training sessions, workshops and conferences. Foremost among these activities is the prestigious International Long-Term Care Conference, drawing over 1000 participants each year from all over the world who work with chronically ill, disabled and elderly people.

[www.ltc-congress.eu](http://www.ltc-congress.eu)

## Training

Our long-standing cooperation with the long-term care and social assistance communities helps us identify the educational needs of professional caregivers.

We respond to these needs by organizing training programs for staff, managers and nurses. We even went one step further and opened Post-Secondary Schools for Medical Carers who want to become professional caregivers.

We run and support educational campaigns in countries where issues associated with personal hygiene, senility, disability and chronic illness are still taboo.

The **SeniControl app** is a smart tool that helps identify the most appropriate incontinence product.

## Optimization

Senioma.net is an optimization tool for residential facilities that makes the purchase of absorbent care products easier, more efficient and more cost-effective.

SeniControl App

## Ordinary sport for extraordinary people...

Since 2001, the International Soccer League for Intellectually Disabled SENI Cup has been gathering people who love playing soccer and, despite their intellectual disabilities, are able to play at an international level. Teams compete in regional qualifying tournaments in order to advance to the Grand Final in Poland. The idea is to integrate, change social attitudes and break down barriers. SENI Cup makes it all real.

[www.seni-global.com](http://www.seni-global.com)

## Publishing activity

We provide information about incontinence and general principles of long-term care in handbooks and other informational materials published in multiple languages.

We also participate in joint publishing projects addressing topics such as chronic illness, drug therapies, care and rehabilitation.

## Supporting informal caregivers

In today's aging society more and more people require frequent or constant care. Those who take care of disabled, elderly or other dependent family members at home often struggle to cope with this enormous responsibility. TZMO believes it is critical to provide support to these caregivers. Through the "We can do it" project, Seni uses workshops, video tutorials and free handbooks to make everyday homecare easier on the caregivers.
